

Python file

```
import ibm_db
conn = ibm_db.connect(

"DATABASE=b1udb;HOSTNAME=#;PORT=32731;SECURITY=SSL;SSLServerCertificate=Dig
iCertGlobalRootCA.crt;UID=#;PWD=#",
    '', '')
print('connction successfull')
```

For security reasons I am not going to submit my database username, password, hostname in git
